Part #	Sanding Grit
TP00085	80
TP00105	100
TP00125	120
TP00155	150
TP00185	180
TP00225	220

ToolPro Sanding Pads are manufactured to OEM specifications, providing a superior finish and longer life. Our proprietary thermo-adhesive bonding of sandpaper to foam produces a uniform sanding surface that eliminates the buildup of dust on the Sanding Pad that can impact the finish. The concentric design means no vibration and the finest gluing technique means the paper will not delaminate from the foam backing like so many others.

- Designed to work with all power sanders as well as all nominal 9 in. (225 mm) round hand sanders including Porter Cable, Flex and Aleko
 - Coarse 80 grit for leveling imperfect surfaces, removal of material and heavy sanding
- Made with the highest quality anti-clog aluminum oxide grit for longer disc life, higher removal rate and consistent surface finish
 - Great for rough cleanup of residue and old finishes
